

I strongly oppose the Consumer Bankers Association petition to enforce the consequences of this unsolicited exemption on my family and I. The Indiana Telephone Privacy program has provided a grave improvement in my family's Quality of Life. The rights of the American citizens who have voluntarily signed up for a desired service to stop these nuisance calls are at risk. I ask that you please compile Quality of Life metrics before ruling favorable to the CBA and weakening an Indiana law that is beneficial to so many. There are plenty of venues for all members of the CBA to spread their sales propoganda without violating the privacy of those who oppose the invasion of them intruding on our personal time with unwanted telephone calls. Thank you for listening!
